

## GoFaster keeps providing the 800 family with maximum performance

Ever faithful to its objective of achieving the maximum interactive performance on any AS/400 model, iSeries or System i, GoFaster has improved and updated its software for all the 800 family. After almost 6 years in the market, the 800, 810 and 825 models are one of the most widely used group of the iSeries/System i server. This 800 family provides excellent examples of the different possibilities of controlled interactive performance in existence:

- We can find models with an interactive performance of “0”. That is, none! (1)
- Models with an interactive performance as little as a twentieth of the total CPW (2)
- Others have an interactive performance as little as a twelfth part of the total CPW (3)
- And models where interactive performance isn’t limited at all (4)

These concepts are better understood if we take a look at the following table:

System Series <b>800, 810, 825</b>	Processor feature	Processor CPW Total	Upgrades	Software Tier	Processor n-way	5250 CPW Interactive	GoFaster CPW Interactive	Performance increased by GoFaster	Notes
800_0865_7408	7408	950	0	P10	1	50	<b>950</b>	<b>19</b>	(2)
800_0864_7400	7400	300	1	P05	1	25	<b>300</b>	<b>12</b>	(3)
810_0866_7409	7409	1020	2	P10	2	1020	1020	<b>0</b>	(4)
810_0866_7407	7407	1020	3	P10	1	0	<b>1020</b>	<b>1020</b>	(1)
825-0873_7418	7418	3600	0	P30	3	3600	3600	<b>0</b>	(4)
825-0873_7416	7416	6600	0	P30	6	0	<b>6600</b>	<b>6600</b>	(1)

You can see that **GoFaster** can achieve amazing results, especially in cases (1), (2) and (3). In case (1) **GoFaster** allows a ‘0’ performance to become its maximum. In cases (2) and (3), GoFaster comes in multiplying their original capacity up to 12 and 19 times more. In conclusion, with **GoFaster**, you always obtain the maximum interactive performance for each machine, whether the machine is limited by CFINT or the auto regulator. Using **GoFaster** you are getting the maximum performance from the hardware you’ve bought. GoFaster’s track record is demonstrated by 8 years of international success

## GoFaster Community

**GoFaster** users’ loyalty is a consequence of its effectiveness and the technical support given by American Top Tools in response to any operational issues. More than 70% of users renew and extend their licences. Some have even renewed their licences for more than 7 times!

This scenario & state of affairs has also influenced the rapid take-up of permanent licences because of their advantage over machine renewals or upgrades.

In 2009, **GoFaster** is maintaining an increase in sales especially in the Asian market where the AS/400 and i5 is experiencing strong market presence and penetration.

The ability to apply **GoFaster** on all LPARs, without a price increase, is also welcomed favourably and we plan to keep this attractive pricing policy in order to assist our customers in these tough economic times.
